for Mass Data Operations
(offline)**

Protects your investments by avoiding losing and misplacing of the assets

Benefits

This software is specially designed to keep track of all company assets by category and sub category wise like tools, machinery, office equipments, office furniture, computer equipments etc. Supports multi company, division, department and locations (projects, offices and stores).

With one click you can know which asset is lying where, with whom, how long and for what. The inbuilt audit module will give you the report of missing assets and displaced assets. Asset register will have complete details like manufacturer, brand, model, make, serial no, barcode, rack reference, asset GL account, asset accumulated depreciation GL account, asset depreciation expense GL account, supplier details and many more. So this software is very useful for any business of any size and activity.
