- In simple it is powerful online (internet) software with many other features and benefits.

Websites & Multimedia

e-Business Applications is one of the leading Internet software solutions provider in UAE. We are specialized in designing high quality professional websites of both static and dynamic (content management) types. In static, website content (Text and pictures) is fixed and site owner cannot modify the content by himself. Where as Dynamic (Content management) websites will have database support with specially designed web control panel to update the web content by yourself easily. We do provide domain name registration, Hosting and POP3 e-mail accounts (Ex. yourname@yourcompanyname.com).

We have ready web control panels, search engines, shopping carts, enquiry forms, product engines, property engines etc., for different types of businesses like trading, real estate. These websites can be independent or can be integrated with our business and accounting software.

Ex: Real Estate website:

Site visitors can search for required properties by selecting different options like project, tower, unit size, property type, view, area and price range and can send online enquiry, which will come to you as an formatted email. Dynamic engine updates the property availability details, pictures and floor plans either from main software or from a specially designed web control panel. Without programming knowledge you can update by yourself.

We are also specialized in making multimedia presentations & e-learning via computer based training guides (CBT).
